## Projects:

**Warrior Fitness Tracker** | Link to Github: <https://github.com/brw1820/warrior> |

Link to Deployment: <https://kgbc-warrior.herokuapp.com/>

- The purpose of this project was to create a hub for people to find safe workouts that instructors could login with a password, and create, update, and delete workouts specific to their own profile.
- My primary role for this project was developing much of the back-end responsibilities including writing the API calls to properly implement CRUD routes for the workouts as well as integrating Firebase as a key feature for authentication.
- Languages used for this were Javascript, JQuery, Bootstrap, Firebase, Node.js, MongoDB, Express, & ReactJS.

**Read More TV** | Link to Github: <https://github.com/brw1820/ReadMoreTV> |

Link to Deployment: <https://jameygronewald.github.io/ReadMoreTV/index.html>

- The purpose of this project was to use Google Books API and TVMAZE API calls to compare and find books and movies of similar genre and topics.
- My main focus of this project was in styling the HTML and CSS of the website with the help of Bootstrap CSS.
- Languages used for this were HTML5, CSS3, and Bootstrap CSS
